

United Pet Care Announces Partnership with P3 Technologies to offer a seamless flow of medical data and pet prescriptions for vet clinics.

March 9, 2023 (Phoenix, AZ) - United Pet Care (“UPC”), a world leader in employee pet care benefits, has partnered with P3 Technologies to offer its network of vets the technology to provide a seamless flow of medical data and pet prescriptions within their clinics and online..

P3’s solutions are built with the wants and needs of vets in mind to streamline existing standard processes, provide fast access to critical information and data reporting, and create revenue opportunities through a simplified prescribing tool. These services are now available to each and every UPC vet at no additional cost.

"P3 is proud to be the engine behind UPC's new online pharmacy feature - empowering vets to streamline a time-consuming and clunky prescribing process, and get back more time to focus on their patients. As an extension of UPC's impressive features and benefits, our proprietary platform is the only fully-integrated prescribing tool for both in-clinic and online prescribing, ringing in a new era of practice optimization and harmony for veterinarians and hospital staff as they meet the needs of pet parents," notes Rob Levin, CEO of P3 Technologies, a Pet Assistant Holdings company.

Aaron Oaks, Chief Executive Officer of United Pet Care, adds, “UPC strives to provide our network partners with proprietary access to cutting edge services to help relieve everyday practice management challenges. P3 Technologies’ seamless end-to-end prescribing and ordering workflows are a huge benefit to veterinary hospitals, saving them both time and money. This ultimately creates happy pet parents and, most importantly, happy and healthy pets.”

About United Pet Care

United Pet Care is a world-class pet healthcare membership benefit for top employers around the nation. Through our network of 1,500+ vets, we provide a value-conscious, inclusive alternative or complement to traditional pet insurance for members. UPC offers big benefits and even bigger rewards which in turn creates a better breed of highly engaged pet parents for veterinarians.
